### **Mechanical Engineering Honors Research Project**

#### **ME 499H**

Student's Name \_\_\_\_\_ Student # \_\_\_\_\_

Students EMAIL: \_\_\_\_\_

Qtr/Yr \_\_\_\_\_ Number of Credits \_\_\_\_\_ Date \_\_\_\_\_

*ME 499 is a variable credit class. Honors classes are typically offered for 3 credits towards a total of 9 credits required for the Honors Program. A maximum of 9 credits of ME 499 can be used for credit toward graduation for the required 18 credits of ME Option credits.*

#### **Criteria for a ME 499 Honors Research Project**

- 1) It should be independent work done under the direct supervision of a faculty member.
- 2) It should not be an assigned class or group project.
- 3) It should be distinguished from the standard senior class project by the quality of work.
- 4) It must result in a single student author writing a report or thesis of publishable quality before a grade will be assigned for the quarter.
- 5) A copy of the final graded report or thesis is to be turned into the Mechanical Engineering Student Services Office, MEB 143B, upon completion of the project.

#### **Project Description**

*Please attach a detailed description (3-5 pages double-spaced, 1" margins, and 12-point font) of the project for review by the Mechanical Engineering Undergraduate Faculty Advisor, that describes "what distinguishes it as an Honors Project".*
