

Fantastic careers (and where to find them)

Gail Cornelius

Director of the Career Center @ Engineering
University of Washington

Jan. 16, 3:30 pm | MEB 248

ABSTRACT

Although the number of jobs is increasing, having an engineering degree alone does not guarantee placement after graduation, and trying to set yourself apart in the job market can be a challenge. Employers are looking for “the right fit” — a talented & well-rounded candidate with in-demand skills. At this session, you will get top tips about the hiring process from an experienced engineer & recruiter. From resume basics to social media usage, learn how your “personal brand” & application materials can be molded to make yourself more marketable.

SPEAKER BIO

Gail Cornelius is the inaugural Director of the University of Washington’s “Career Center @ Engineering” (CC@E), which opened in September 2015. With her Bachelor’s & Master’s degrees in Industrial Engineering, she spent 18 years at The Boeing Company, with roles in organizations such as Competitive Analysis, Supplier Management, and Product Development. She also managed Boeing’s Puget Sound intern program and spent 15 years recruiting at her alma mater, Cal Poly. Before leaving Boeing, Gail’s last role was Chief-of-Staff for Boeing Commercial Airplanes’ Vice President of Engineering, for whom she oversaw strategy across the company’s three US design centers.
